## **1. Introduction**

Servento is Asia's largest online home services platform, operating in India since its launch in 2014. The platform facilitates booking reliable high-quality services ranging from home and beauty services to kitchen cleaning, electrical, plumbing, and gardening tasks, all delivered by trained professionals conveniently at home. The vision of Servento is to empower millions of professionals worldwide to deliver services at home like never before.

## **2. Proposed System**

The proposed system of project documentation is a comprehensive document which outlines the details of a proposed project. proposed system typically includes information about the project's scope, objectives, advantages, limitation and other relevant details.

## **2.1 Scope**

The proposed system aims to address the limitations of the existing service procurement system, offering an e-commerce solution where users can buy and sell products or goods online. This system enables purchasing services online, providing a wide range of services, online payments, thereby enhancing the buying experience and helping vendors reach a wider market.

## **2.2 Objectives**

- a. To develop a web-based platform that facilitates online booking of various home services like beauty services, cleaning, electrical, plumbing, gardening, etc.
- b. To provide a user-friendly interface for users to browse and book services, manage orders, and make payments
- c. To enable vendors to register, manage their services, staff, and handle bookings and invoices efficiently.
- d. To allow admins to oversee and manage various aspects of the platform, including categories, services, vendors, users, invoices, and reports.

## **2.3 Advantages:**

1. **Convenience:** Servento offers a convenient way for users to book various home services online without the need for physical visits or phone calls, saving time and effort.
2. **Wide Range of Services:** The platform provides a diverse range of services including beauty services, cleaning, electrical, plumbing, and gardening,

catering to different user needs.

3. **Increased Accessibility:** By offering an online platform, Servento increases accessibility to services for users who may have difficulty accessing traditional service providers.
4. **Enhanced User Experience:** With features such as online payments and order management, Servento enhances the overall user experience by providing a seamless and efficient service booking process.
5. **Business Opportunities:** Servento creates opportunities for vendors to expand their market reach by providing a platform for them to showcase their services and attract customers.

#### **2.4 Limitations:**

1. **Dependency on Technology:** Since Servento is a web-based platform, users and vendors may encounter difficulties if there are technical issues such as server downtime or internet connectivity issues.
2. **Trust and Reliability:** Users may have concerns regarding the reliability and quality of services provided by vendors, as they may not have the opportunity to physically inspect the service providers before booking.
3. **Geographic Limitations:** While Servento operates in India, it may face challenges in expanding to other regions due to differences in regulations, cultural preferences, and market dynamics.
4. **Competition:** Servento operates in a competitive market with other online service platforms, which may pose challenges in acquiring and retaining customers.

## **4. System Planning**

### **4.1 Feasibility Study**

A feasibility study delves into various facets of software development, examining the viability of tackling a given problem or requirement. It evaluates whether the challenge can be effectively addressed within the confines of budgetary, operational, technical, and scheduling constraints. The primary goal is to pinpoint the optimal solution considering its implications on the organization.

Our project's feasibility is assessed across dimensions such as time, technology, available resources, behavioral considerations, and development costs.

### **4.1 Software Engineering Model**

This Software is developed using Agile Feature-Driven Development(FDD), The main motive of Feature-Driven development is to provide timely updated and working software to the client. In FDD, reporting and progress tracking is necessary at all levels.

## **5. System Analysis & Modeling**

### **5.1 SRS (Software Requirement Specification)**

A software requirements specification (SRS) is a document that describes what the software will do and how it will be expected to perform. It also describes the functionality the product needs to fulfill the needs of all stakeholders.

#### **5.1.1 Functional Requirements:**

##### **a. Admin:**

###### **1. Manage Categories:**

- Admin can insert, update, and delete categories for services.

###### **2. Manage Vendor Verification:**

- Admin oversees the verification process of vendors registering in the system.

###### **3. Manage Services, Videos, and Articles:**

- Admin can insert, update, and delete services, videos, and articles.

###### **4. Manage Product Categories and Invoices:**

- Admin manages product categories and invoices of orders.

###### **5. Manage Users and Staff:**

- Admin manages user and staff details, including insertion, updating, and deletion.

###### **6. View User Details and Orders:**

- Admin can view user details, total number of orders, and total amount.

###### **7. Manage Reports:**

- Admin manages reports generated by the system.

##### **b. User:**

###### **1. Register and Login:**

- Users can register and log into the Servento process system.

###### **2. Forgot Password:**

- Users can retrieve their password if forgotten.

### **3. Remember Login Credentials:**

- Users can choose to remember their login credentials for convenience.

### **4. Inquiry and Contact Vendor:**

- Users can inquire about services and contact vendors for details.

### **5. Query Response from Admin:**

- Users receive responses from the admin for their queries.

### **6. Browse Products and Add to Cart/Wishlist:**

- Users can browse products, add them to the cart, and wishlist.

### **7. Order Management:**

- Users can view orders, cancel orders, and download invoices.

## **c. Vendor:**

### **1. Manage Subcategories and Types:**

- Vendors can insert, update, and delete subcategories and types.

### **2. Manage Staff Verification:**

- Vendor manages the verification process of staff registering in the system.

### **3. Manage Services, Videos, and Articles:**

- Vendors can insert, update, and delete services, videos, and articles.

### **4. Manage Product Categories and Invoices:**

- Vendor manages product categories and invoices of orders for their offerings.

### **5. Manage Vendor and Staff Details:**

- Vendors manage details of themselves and their staff, including insertion, updating, and deletion.

### **6. View User Details and Orders:**

- Vendors can view user details, total number of orders, and total amount related to their offerings.

### **7. Register and Login:**

- Vendors can register and log into the Servento process

### **system. 8. Forgot Password:**

- Vendors can retrieve their password if forgotten.

### **9. Assign Staff:**

- Vendors can assign staff to various roles or tasks within their

business operations.

### **5.1.2 Non-functional Requirements:**

- **Web Based:**
  - The application will be web-based.
- **Languages:**
  - The user interface and data will be in English.
- **Performance:**
  - The system should ensure fast response times for all user interactions.
- **Scalability:**
  - The system should be capable of scaling horizontally to accommodate a growing user base.
- **Reliability:**
  - The platform should have a high uptime percentage.
- **Security:**
  - The system should implement robust security measures to protect user data.
- **Usability:**
  - The user interface should be intuitive and easy to navigate.
- **Compatibility:**
  - The platform should be compatible with a wide range of devices, browsers, and screen sizes.
- **Data Management:**
  - The system should maintain data integrity and consistency across all operations.
- **Integration:**
  - The platform should seamlessly integrate with third-party services.
- **Regulatory Compliance:**
  - The system should comply with all relevant laws and regulations.
- **Support and Maintenance:**
  - The platform should provide comprehensive documentation and support resources.

### 6.2.1 Admin login page

### 6.2.2 Admin reset password

### 6.2.3 Admin Dashboard :

The dashboard has a sidebar on the left with 'MAIN' and 'COMPONENTS & EXTRA' sections. Under MAIN, 'Servento' has a sub-item 'Admin Home page'. Under COMPONENTS & EXTRA, there are links for Vendor, Artical, Location, Category, Sub Category, Request Quote, User, Vendor, Staff, WishList, Video, and Voucher. The main content area shows 'Analytics' for 'Dastone / Dashboard' with a date 'Today: Mar 28'. It displays four summary cards: 'Vendor 10 Total Vendor', 'Category 6 Total Category', 'Sub Category 34 Our Total Sub Category', and 'User 3 Total User'. Below these are eight user profile cards arranged in two rows of four. The profiles are: Mansi (Cleaner), Vivekita (Electrician), Shrutiya (Electrician), Purab (Gardener); Harsh (Plumber), Kairav (Hair Salon), Pakhi (Cleaner), Binita (Beautician); Heet (Electrician), and Ruju (Electrician). The footer includes copyright information: '© 2020 Dastone' and 'Crafted with ❤ by Mannathemes'.

 <b>Carpenter</b> Construct and install building frameworks, including walls, floors, and doorframes. Inspect and replace damaged framework or other structures and fixtures. Instruct and direct laborers and other construction helpers.	 <b>Painter</b> Painters apply paint, stain, and coatings to walls and ceilings, buildings, large machinery and equipment, and bridges and other structures.	<b>AC Repairer</b> The AC Repair process is essentially the process of restoring an air conditioner to working order. Though each unit requires a unique approach to service, the general method involves inspecting the various components of the system, servicing what needs servicing and performing any repairs that are deemed necessary.
	 <b>Roofing</b> For small leaks and holes, the roofer will typically use a primer and adhesive patch to seal the damaged area. Alternatively, the roofer may use a specially-designed glue to repair small holes or cracks. Larger repairs often require replacing an entire section of rubber roofing and resealing the seams.

## **7. Testing**

### **7.1 Functional Testing:**

- **Admin Management:**
  - Verify admin's ability to manage categories, vendor verification, services, product categories, invoices, users, staff, and reports.
- **User Functionality:**
  - Test user registration, login, password recovery, inquiry, contact vendor, query response, browsing products, adding to cart/wishlist, and order management.
- **Vendor Management:**
  - Validate vendor's ability to manage subcategories, staff verification, services, product categories, invoices, vendor/staff details, registration, login, password recovery, and staff assignment.

### **7.2. User Interface Testing:**

- **Navigation and Display:**
  - Ensure intuitive navigation and proper display of content across various devices and screen sizes.
- **Accessibility Features:**
  - Test accessibility features such as screen reader compatibility and keyboard navigation.

### **7.3. Compatibility Testing:**

- **Browser Compatibility:**
  - Test platform functionality on major browsers (Chrome, Firefox, Safari, etc.).
- **Device Compatibility:**
  - Ensure compatibility with different devices, including desktops, laptops, tablets, and smartphones.

### **7.4. Performance Testing:**

- **Scalability Testing:**

- Conduct load testing to evaluate system response and stability under heavy user traffic.
- **Response Time:**
  - Ensure fast response times for all user interactions.

## 7.5. Security Testing:

- **Data Protection:**
  - Implement encryption and secure authentication protocols to protect user data.
- **Vulnerability Testing:**
  - Conduct vulnerability testing to identify and address potential security risks.

## **8. Future Enhancement**

- We can add a job listing feature in Servento. So that we can recruit candidates directly from the website .
- We can add more services like the painter category.
- We can add a live chatting feature.
- We can add working time to the website.
- We can add an SMS feature for verification purposes or provide a choice of WhatsApp, SMS or mail for verification purposes.
- We can make the service available worldwide.
